
Job Role: Senior Developer

Location: London, Graz

Secgate is looking for a senior front end developer who is passionate about building the best user experience for clients using the most advanced network security tools.

The company is looking to:

- 1) Evolve the existing product to create a unique and innovative network security solution
- 2) Grow the solution from being a niche product to expand into new enterprise markets
- 3) Provide a distinctive solution to the latest cyber threats faced by the most demanding organizations

As a senior developer for Project Sigma, you will take a lead role in the design and development of a user interface to simplify the analysis of information in a big data repository. You will be part of an international team with a startup attitude. You will be working closely to the Product Manager and UX expert to provide the best user experience and achieve a high quality product.

Key responsibilities include:

- Developing a web interface from designed specifications
- Absolute focus on user experience
- Working in a multidisciplinary team dispersed across different locations
- Create highly reusable, secure and quality code
- Occasionally perform server side work integrating 3rd party APIs and setting up front-end server technology
- Optimize the code for automated testing
- Experience with debugging techniques
- Ability to efficiently organize own code
- Good communication skills

Key skills:

- HTML5
 - CSS3
 - Data visualisation
 - Grunt or other task automation tools
 - Elasticsearch
 - Desirable secure coding practices
-

Qualifications

- Bsc in Computer Engineering or similar degree
